

CONTINUING PROFESSIONAL DEVELOPMENT

SELF PACED

NOISE MANAGEMENT MODULES

Acoustar is a registered training organisation providing structured self-paced 'at-home or work' Short Course and Continuing Professional Development (CPD) modules in noise monitoring, noise evaluation and noise risk management. A Statement of Participation is awarded on completion of a Module. Each module is a self-paced, structured learning program of a minimum 10-hours' home or work study and assignments:

- Noise evaluation in practice
- Legislation, standards, guidelines
- Basic acoustic principles
- Sound and noise measurements
- Noise monitoring instruments
- Sound propagation and noise mapping
- Practical noise surveys
- Specialist topics - as requested - e.g. Noise Risk Management

Plate 1 illustrates the noise interactions and risk management involving:

- Industry and construction noise
- Design of spaces - amenity
- Entertainment noise
- Manufacturing noise monitoring
- Office noise exposure
- Personal noise exposure
- Residential amenity
- Transportation noise
- Vibration monitoring

Our training is designed for field staff, site coordinators, Health & Safety Representatives, managers and senior personnel employed by enterprises/unions/regulatory authorities in a wide range of industry sectors, such as: building and construction; manufacturing; residential building design and certification; regulatory compliance. We also assist people needing 'return to industry' field work.

We train confident, competent personnel
